- 15% Private Vesting

30% Liquidity / Staking -

- 15% Public Vesting

10% Marketing -

- 10% Dev Team

ETHEREUM NET Token Distribution:

Staking/Liquidity 30%

- tokens that will be sent to staking and exchange platforms for liquidity. Will be sent and locked in liquidity via router contract for no less than 3 years!

Gaming/Rewards 20%

- tokens are placed in a locker for the use in gaming rewards and platform giveaways – locker contract needs majority M4 NFT holder vote to move tokens…. The exact mechanics for this will be voted on and designed to work in the best interests of the majority of M4 Rabbit NFT Holders.

Private Vesting 15%

- These are investment opportunities for associates and friends of the project that are offered in private to whitelisted persons & NFT holders at discount - UNSOLD BURNED – All tokens from this round that are not sold will be officially burned in an online ceremony :-)

Public Vesting 15%

- offered in public to everyone (through platform??) - UNSOLD BURNED

Marketing Vested 10%

- a specific wallet that will be used to run marketing and ad influencer campaigns to draw attention to project and gaming as they launch. 10% every 30 days

Dev/Treasury unlocked 10%

- available straight away this is basically what the team will use to cover costs to date and pay dev salaries etc.

Between private holders, Burn and liquidity there are in total **60%** of ALL Tokens

A further **20%** of Total Tokens can only be rewarded to M4 NFT Holders.

Of the remaining 20% HALF locked at 10% every 30 days and 10% unlocked.

Staking gaming REWARDS

"We have just short of 385 thousand dollars allocated to a fund to be split between staking rewards, gaming and competition prizes."

Development

"we have a dev fund to the tune of nearly 100 thousand dollars set aside that will go towards upgrades and additions to the platform and the Head Dev on the project will sign a three year Dev contract when we mint NFT 1000."
